Art Unit: 3627

## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tedesco et al. Tedesco et al teach a method of operating a reservation control system for reserving items dispensed by a vending machine comprising the steps of: receiving a reservation request from a vending machine computer for an item (see col. 7, lines 1-13); determining whether the item is available at a vending machine (see col. 6, lines 6-26); and reserving the item by placing a hold on it (see col. 8, lines 3-17 and col. 9, lines 34-50). Tedesco et al further teach the steps of transmitting a message indicating that

→ Application/Control Number: 09/848,572

Art Unit: 3627

the reservation request has been accepted and the item is reserved for future pickup, along with a message containing a confirmation number (see Fig. 3B). Tedesco et al further teach the step of updating the removing a reservation request upon determining that the item has been purchased from the vending machine (see Fig. 9). Tedesco et al further teach the use of item identifiers (see Fig. 5). Tedesco et al further teaches the step of calculating a service charge, where the charge increases as the length of time of the reservation increases (see Fig. 4).

Tedesco et al do not teach a vending machine network. Freeny, Jr. teaches a computer network that includes vending machines (see Fig. 7), wherein a user can use a computer or wireless telephone to place a vending machine order (see, for example, col. 2, lines 3-46). It would have been obvious to employ the teachings of Freeny, Jr. with the invention of Tedesco et al to allow users to employ a network to allow users to use multiple vending machines and to place an order through a computer or wireless phone for convenience.

Tedesco et al do not teach data structures. However, data structures are common in the art and it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ data structures to indicate the number of items available, because data structures are an efficient means of storing data.

## Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Paek discloses a vending machine with a reservation

Application/Control Number: 09/848,572

Art Unit: 3627

compartment. Okayama et al disclose a vending machine that reserves commodities. Satoh et al and Kolls disclose vending machine networks.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bryan Jaketic whose telephone number is (703) 308-0134. The examiner can normally be reached on Monday through Friday (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached on (703)308-5183. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
